## Colorcoat Urban® rain water systems

### Gutter systems to perfectly match your Colorcoat Urban® roof

Colorcoat Urban® offers a range of colour matched gutters suitable for a wide variety of roofs from the smallest domestic to the larger agricultural or commercial buildings.

Whether you are a home-builder, an architect, a contractor or a developer, we can supply a range of quick fit gutters that blend seamlessly into the roofline.

Available as 'external' or 'hidden' options, all our gutter packages are supplied to a superior finish as quick fit components that are easy and consistent to install.

#### Benefits:

- Can be perfectly matched to your roof.
- Highly durable material suitable for a wide range of rainwater applications.
- High quality, superior finish.
- Quick and easy to install.
- Off-site manufacture for consistency time after time.

#### Colorcoat Urban® roof system

Colorcoat Urban® is an innovative, quick fit, standing seam roof and wall cladding material, ideal for residential and small projects. Manufactured off-site and supplied as a kit of parts, it delivers modern aesthetics with eco-credentials. It is available in a range of colours designed to blend harmoniously with the landscape and comes with guaranteed performance for up to 40 years on roof pitches as low as 5°.

#### Customer service and support

To obtain a no-obligation, fully itemised estimate speak with one of our Colorcoat Urban® experts. Our team are on hand to provide estimates, samples and advice on the performance and most suitable system for your project. In addition our dedicated team can provide comprehensive support at every stage of your project.

**Gutter options:**

**External:** Our box gutter profile is designed to complement the Colorcoat Urban® roof system. Its box shape blends perfectly into the roofline, and comes complete with colour matched square downpipes.

This system is secured into the fascia using top fix brackets that provide an uninterrupted gutter line when viewed from ground level.

The external gutter profiles are stocked in Colorcoat Urban® matt shades, Anthracite and Merlin, with short lead-times. Other colour options are available on request with longer lead-times.

**Hidden:** A bespoke rainwater system that can be formed to suit almost any application. The gutter is hidden within the roofline and is ideal for use where roofs come together, or when the design requires a clean edge to the roof. This system has total flexibility and can be designed and tailored to suit your exact requirements.

The hidden gutter profiles are supplied in Colorcoat® Aquatite, specifically developed for rainwater applications and ideally suited to the most demanding applications.

**Colorcoat Urban® - gutter properties**

External box gutter		Hidden gutter	
<b>Length:</b>	3 m	3 m (fabricated to suitable shape)	
<b>Fixing:</b>	Top (1 bracket every 500 mm)	Sits within roof structure (internal butt straps)

<b>Accessories:</b>	Hoppers and stop ends	Hoppers, stop ends and parapet fascia cap	
<b>Profiles: External</b>		<b>Profiles: Hidden</b>	

**Technical:**

Gutters are designed based on the roof position and split into three categories:

- Cat 1 – External gutters (permit overflow over the front face of the gutter).
- Cat 2 – Hidden gutters (permit overflow over an external face).
- Cat 3 – Internal gullies and valleys (depth and suitable outlets required to dispose of heavy rainfall).
